Re: Waste Water Update

Here is a summary of our waste water disposal efforts for the month of July.

Waste water removed from Westwoods premises via tank truck (U.S. Environmental) as follows:

July 7 th , 2004	6000 gals.
July 14 th , 2004	6000 gals.
July 21 st , 2004	6500 gals.
July 28 th , 2004	<u>6000 gals.</u>

Total-24,500 gals.

This reflects a cost of \$3,430.00.

Evaporation Pool Efforts:

9 ½ totes have been deposited into the pool with an estimated 2000+ gals. being evaporated off, this reflects a savings of \$280.00. Further evaporation efforts are being conducted by the maintenance department on an experimental spraying of the waste water into one of our compressors.

If you have any questions on the above, please do not hesitate in contacting me.
